# Contents

## Key to Staff:

ICT Manager – Jared Martin (MAJ)
Data Protection Officer – Helen Howley (HOH)
Headteacher – Katrina Boyle (KBO)

# 1. Introduction

The Harefield Academy (THA) seeks to promote and facilitate the proper and extensive use of Information and Communications Technology (ICT) in the interests of learning, teaching and research, including business and community engagement partnerships. This requires responsible and legal use of the technologies and facilities made available to students, staff and partners of The Academy.

The Acceptable Use Policy applies to all computing, telecommunication, and networking facilities provided at The Academy and should be interpreted such that it has the widest application. ICT Services should, where appropriate, be taken to include departmental or other system managers responsible for the provision of an ICT service. This policy should be interpreted so as to encompass new and developing technologies and uses, which may not be explicitly referred to.

The Harefield Academy ICT resources are provided to facilitate the essential work of employees or students and to help enhance the wider experience of students attending The Academy. Use of ICT Services should not interfere with duties or studies nor should their use bring The Academy into disrepute in any way.

Commercial work for outside bodies, using centrally managed services, requires explicit permission from the ICT Manager; such use, whether or not authorised, may be liable to charge.

If the ICT Manager is unavailable, contingency plans are in place where 3rd party support can be obtained including remote assistance or a support engineer being sent onsite to cover in the ICT Managers absence. Documentation has been left with the Headteacher obtaining to passwords and network information that will be necessary for the 3rd party support. This must not be shared with anyone else or left unsecure. This documentation must be retrieved from the technician before they leave site and locked away.

# 2. Authorisation

Registration is required in order to use the ICT facilities of THA. Such registration is conditional upon acceptance of and adherence to this Policy which must be signed by all employees and students.

The registration procedure grants authorisation to use the core ICT facilities of The Academy. Following registration, a username, password and e-mail address will be allocated.

Individually allocated usernames, passwords, certificates, laptops, iPads, Apple Mac Air/Pro and e-mail addresses are for the exclusive use of the individual to whom they are provided. The user is personally responsible and accountable for all activities carried out under their username. The

password associated with a particular personal username must not be divulged to any other person, other than, in person, to known designated members of IT staff for the purposes of system support. No one may use, or attempt to use, ICT resources allocated to another person, except when explicitly authorised by the provider of those resources.

All users must correctly identify themselves at all times. A user must not masquerade as another, withhold their identity or tamper with audit trails. A user must take all reasonable precautions to protect their resources. Passwords will only be accepted if they:

- Are at least 6 characters in length;
- have not been used in your previous 10 passwords;
- have not been changed in the last day;
- do not contain your username or full name;
- contain at least three of the following four character groups: an uppercase letter (A - Z), a lowercase letter (a - z), a number (0 - 9,), a non-alphanumeric character (e.g.!, $, #, %).

Additionally, passwords are forced to be changed every 3 months for additional security. Reset passwords can only be issued in person, over the phone or via email from ICT Services. Passwords will never be given out via email or over the phone. The ICT Network Manager is responsible for prompting and checking password changes termly.

# 3. Data Security

ICT (including data) and the related technologies such as e-mail, the internet and mobile devices are an expected part of our daily working life in school. The Data Protection Act (1998) governs the storage and transfer of data and any breach can result in prosecution.

This policy is designed to ensure that all staff are aware of their professional responsibilities when using any form of ICT. All staff are expected to sign this policy and adhere at all times to its contents. Any concerns or clarification should be discussed with the ICT Manager, or IT technicians. By logging on to ICT systems, users agree to abide by this Acceptable Use policy and other policies related to the use of ICT.

It is important that staff are aware that within the terms of the Data Protection Act and the Telecommunications Regulations 2000, (Interception of Communications), The Academy may record or inspect any information transmitted through or stored in its computers, including e-mail communications and individual login sessions, without notice when:

- There is reasonable cause to believe the user has violated or is violating this policy, any guidelines or procedures established to implement this policy;
- An account appears to be engaged in unusual or unusually excessive activity;
- It is necessary to do so to protect the integrity, security or functionality of ICT resources or to protect The Academy or its partners from liability;
- Establishing the existence of facts relevant to the business;
- Ascertaining or demonstrating standards which ought to be achieved by those using the ICT facilities;
- Preventing or detecting crime;
- Investigating or detecting unauthorised use of ICT facilities;

- Ensuring effective operation of ICT facilities;
- Determining if communications are relevant to the business (for example in the last resort where an employee is off sick or on holiday and business continuity is threatened.)

This policy also assumes a common interpretation and application of associated guidance contained within the following:

- General Data Protection Regulation, 2018
- Copyright, Designs and Patents Act 1988
- Malicious Communications Act 1988
- Computer Misuse Act 1990
- Obscene Publications Act 1959
- Data Protection Act 1998
- Regulation of Investigatory Powers Act 2000
- Telecommunications (Lawful Business Practice) (Interception of Communications) Regulations 2000
- Freedom of Information Act 2000
- Communications Act 2003

# 4. General ICT Use

- Users should not allow any student or family members to use their Harefield logon, PC, printing ID badge, iPad, laptop or tablet, these are for staff use only.
- When leaving a classroom, it is required that users log off and put the projector into STANDBY. If a computer is unattended for even a short period of time, it should be locked by using CTRL+ALT+DEL and selecting LOCK. Alternatively pressing down the WINDOWS key and pressing L will lock the screen.
- Users must take care to store sensitive information, e.g. student data, safely and to keep it password protected, on all Academy systems and devices.
- Any problems with ICT should be reported to the ICT helpdesk either by e-mail to or by phoning the ICT Services office.
- Use of portable storage devices is prohibited win the Academy and access is routinely prevented.
- All Staff have access to change students passwords using the tool provided in the start menu called Password Control Students. Students should never be allowed to use this software.
- Staff are allocated 6GB of home storage space. When this limit is reached it will not be possible to save further data without freeing up storage space.
- Students are allocated 2GB of home storage space. When this limit is reached it will not be possible to save further data without freeing up storage space.
- Where additional storage is required for educational purposes, this would need to be approved by the IT Manager.

# 5. Staff Laptops/iPads

- The device remains the property of The Harefield Academy at all times and is only for the use of the member of staff it is issued to. It must be returned to The Academy on request.
- Only a soft cloth or approved laptop screen cleaning solution is to be used to clean the device screen.
- Devices should not be dropped, exposed to extreme heat or cold, stored in vehicles or have heavy items place upon them.
- Insurance covers theft and accidental damage but excludes loss and theft from an unattended car. ***Repairs or replacements not covered by the insurance policy will be deducted from the relevant departmental budget.***
- When transporting the device it is important that the device is not left attached to the charging cable as this can lead to damage of the device's charging port.
- The device is for educational purposes only. Any software being added needs to be first checked with the ICT Manager before attempting to install it.
- Should any faults occur, The Academy's ICT staff must be advised as soon as possible so that they may undertake any necessary repairs. Under no circumstances should staff attempt to fix suspected hardware faults.
- Any charges incurred by staff accessing the internet out of school are not chargeable to The Academy.
- All files/folders are automatically backed up every night, including home drives, staff shared area and student shared area.
- No files should be held locally on the device (files should only be stored within The Academy network area accessible remotely.
- The device must be kept secure, logged off when not in use, and remain password protected at all times, whether in school, or when taken off The Academy premises.
- Laptops should be brought into school and connected to the network at least once every month in order to keep antivirus software updated.

# 6. Projectors and Interactive Whiteboards (IWB)

- Projectors should only be turned on and off using the software provided on the desktop of all PCs provided.
- The freeze button should be used to enable teachers to complete registers during lessons. SIMS/emails/student sensitive information should never be projected onto the whiteboard.
- If the Projector or Whiteboard malfunction this should be reported to ICT Services.
- Only the IWB pen provided by The Academy should be used to write on the IWB.

# 7. E-Mails

- The Harefield Academy e-mail addresses (@theharefieldacademy.org) and associated Academy e-mail systems must be used for all official Academy business, in order to facilitate auditability and institutional record keeping.
- The e-mail system is intended for Academy related communication. It should not be used for personal e-mail and should not be used as a personal e-mail account.
- Access to a THA e-mail account will cease when employment ends.
- Incoming and outgoing e-mails are stored on an e-mail server in The Academy. The Academy does not routinely monitor the content of e-mails but we would have to make it available in response to a lawful request from the police or other agency.
- Staff Inbox storage can only be increased if agreed by the IT Manager.

The following guidance should be adhered to by all staff:

- E-mails should only be sent to those who need to receive them, to eliminate time spent by others sifting through unwanted messages. When using predefined groups, think carefully about whether the majority of staff in that group need to receive the e-mail.
- Double check when sending an e-mail that it is going to the intended recipient only, to avoid risk of breaching confidentiality.
- Think carefully about sending confidential information by e-mail which can be duplicated and circulated to others very easily.
- School e-mail may be used to contact parents or students at the discretion of the member of staff. Staff must not contact students or parents using personal e-mail accounts.
- Keep the size of any attachments to a reasonable value (e.g. avoid large images or audio files). Where possible send a link as a zipped file.
- Staff are required to use the same personal and professional courtesies and considerations in electronic mail as they would in other forms of communication.
- If you receive e-mails with attachments, do not open the attachments unless you are absolutely certain you know who they are from and what they contain.
- Save any attachments you want to keep in your private network folder, and delete the original e-mail so as to free space on the email server.
- Delete unwanted e-mails and those e-mails in your 'Trash' or 'Junk' regularly.

# 8. Internet

The following content should not be created or accessed on ICT equipment at any time:

- Pornography and "top-shelf" adult content.
- Material that gratuitously displays images of violence, injury or death.
- Material that is likely to lead to the harassment of others.
- Material that promotes intolerance and discrimination on grounds of race, sex, disability, sexual orientation, religion or age.
- Material relating to criminal activity, for example buying and selling of illegal drugs.
- Material relating to any other unlawful activity, e.g. breach of copyright.
- Material that may generate security risks and encourage computer misuse.

- It is possible to access or be directed to unacceptable Internet sites by accident. These can be embarrassing and such sites can be difficult to get out of. If staff have accessed unacceptable content or are in receipt of unacceptable material via e-mail, they should inform the IT Manager and Designated Safeguarding Lead. This may avoid problems later should monitoring systems be alerted to the content.

# 9. Social Media

- You must not talk about your professional role in any capacity when using personal social media such as Facebook, Twitter, YouTube or any other online publishing websites.
- Social media tools must not be used to communicate with current or former students of school age.
- Your profile on social networking sites should be set to maximum privacy and give access to known friends only.
- Staff must not access social networking sites for personal use during school hours.
- If you experience any derogatory or slanderous comments relating to the school, colleagues or your professional status, you should take screenshots for evidence and escalate to the IT Manager and Designated Safeguarding Lead.

# 10. Cameras/Video

- Under no circumstances will staff use any personally owned equipment for recording video, sound or images of students.
- Images of students and/or staff will only be taken and/or stored on Academy cameras and videos and are only used for professional purposes and with written consent of the parent, carer or staff member. Images will not be distributed outside The Academy network without the permission of the parent/carer, member of staff and Headteacher.

# 11. ICT suites

- Staff should be vigilant in any lesson where ICT is used by students and leave careful briefing notes if the lesson is being covered by someone else.
- Each time students log on to a PC they are required to agree to the Code of Conduct (Acceptable Use Policy).
- When using any of the IT rooms, staff should adopt the following procedure to ensure the minimum of damage to the equipment. ***Please be aware that ICT equipment damaged in lessons may be charged to faculty budgets where policy has not been adhered to and the following checks have not been completed.***

***At the Start of the Lesson***

- Through observation of the students, satisfy yourself that all of the equipment is working. Report any faults to the IT technicians on extension 8002 or by e-mailing ICT services.
- Use Impero to monitor the students' screens. Training provided by the ICT Team.
- If any student has food or drink with them, it should be contained in their school bag and not be removed in an IT room at any time.

***At the End of the Lesson***

- Ensure each student demonstrates to you that the mouse still moves the cursor on the screen and the keyboard is in a usable condition.
- Check that the computers and projectors are turned off, unless you are sure that there is another lesson after yours that day in that room.
- Ensure each student leaves the keyboard, mouse and chair neatly where they belong, and check the keyboards are complete. (No missing buttons.)
- If any faults have occurred during the lesson, report these to the ICT department via the ICT Helpdesk.
- Always use the app Projector Control on the PC to turn on/off projectors. This is located on the desktop.
- Ensure that all printed sheets are collected and not left in the room. Any confidential information printing should be disposed of in the correct way. Shredders are available in The Academy for use.

# 12. iPad Trolleys

- iPads should be counted out at the start of the lesson and counted back in at the end of every lesson. All iPads have a number on the back, for example, iPadMFL-**001**.
- iPads need to be plugged back into their docking bay at the end of lesson in order for them to be fully charged, ready for the next available use.
- When collecting the iPads at the end of the lesson, students should show the main home screen on the device in front of the member of staff collecting the tablet to demonstrate it is still working and that they have not changed the display settings. It is the staff member's responsibility to ensure equipment is not damaged during lessons.
- iPads must never be left unattended with students and only members of staff should be responsible for moving tablets from one room to another.
- Students should use iPads at a desk and in a position which enables the teacher circulating the room to see student screens.
- Any iPad which is not functioning or is discovered to have inappropriate material should be separated from the other tablets and passed to the ICT department.

# 13. Equipment Booking Process

- All equipment to be loaned out must be authorised by a member of staff before being collected by a student.
- Authorisation has to come via email so it is time stamped. This will then get entered into an Excel spreadsheet by the IT manager and the equipment will then be issued.
- If the equipment is required for longer than a double period, a charger will also be allocated.
- No one other than the allocated user is to use the equipment.
- Laptop requests from the welfare officer in relation to student injuries will take priority.
- All equipment is to be returned to the IT office by the end of the school day (unless booked out for a set period of time)

- If the IT office is locked, the equipment is to be left with the corresponding student manager for collection. Failing this, the equipment is to be left at reception for collection via the IT manager.
- All equipment is to be returned in good working condition. Any damage such as missing keys, graffiti, cracked screens/broken hinges will result in charges.
- The student allocated the equipment is responsible for the safekeeping of the equipment whilst in their use or possession.

# 14. Home Learning

- All home learning and remote teaching is to be carried out via G Suite which encompasses Google Classroom, Google Drive & Google Meet.
- Any live teaching platform log ins such as google classroom/google meet to be shared with senior leaders/DSL's who should monitor the content/discussions.
- Ideally no one to one teaching via webcam/video link, live teaching to be to groups of students only – where one to one is needed additional safeguards to be considered such as another member of staff present/family member present with pupil or in earshot.
- Any teaching to be done from an appropriate room - i.e. not a bedroom/ where there is a neutral backdrop, and not personal items in the picture.
- Where possible live classes should be recorded and saved on Google Drive.
- Students must be reminded to disable their camera and microphones so only the teacher can be seen in the meeting.
- Google Classroom and other Google apps are to be used strictly for educational purposes. Sharing of resources outside of education purposes or is strictly prohibited.
- All communication must be carried out using The Harefield Academy email. Work and Google Drive resources cannot be shared with a personal Gmail account.

# 15. The Harefield Academy Wireless Service

This includes the following SSID's:
THA-BYOD-STAFF, THA-BYOD STUDENTS, HAREFIELD GUEST, WATFORD FC GUEST, THA-DOMAIN-STAFF, THA-DOMAIN-STUDENTS

When using The Academy wireless services you must obey various regulations and acceptable use policies. These broadly fall into the two categories below:

- The Law – Use of The Academy wireless services is subject to applicable law.
- The policies and regulations of The Academy. These include:

## 15.1 Wireless service regulations:

1. **Acceptance of responsibility:** A user will be held responsible for any breach of regulations carried out using a connection authenticated with their username. This includes action taken by others.

2. **Identification:** You must not attempt to authenticate yourself using another person's or organisation's credentials.
3. **Network security:** The Academy reserves the right to conduct scans of the network in order to determine what computers are connected to it and what services they are operating. You may not configure your computer to use any network address other than those allocated to you.
4. **Computer security:** You must ensure that your computer has up-to-date anti-virus software and that all operating system updates and other security updates are installed. You must remove any malware found on your computer.
5. **Service operation:** You must not do anything that interferes with the operation of the wireless service. This includes using an unfair or excessive share of the available network bandwidth.
6. **Copyright:** It is illegal to copy or share movies, music, software and other copyrighted material without permission from the copyright holder. You must not do this, whether intentionally or as a failure to correctly configure a file-sharing program on your computer.
7. **Data protection:** Personal data can only be processed under strictly limited circumstances. Please refer to the Academy The Academy Data Protection Policy.

## 15.2 Penalties

1. **Withdrawal of facilities:** ICT Services may withdraw or restrict your access to the wireless service or other ICT Services.
2. **Disciplinary action:** Any breach of regulations may be reported to your line manager or Head of Department. In more serious or repeated minor cases, a breach of Academy regulations may be reported to the Headteacher to be dealt with under The Academy's disciplinary procedures.
3. **Fines:** ICT Services may request that a user be charged for extra work that has arisen as the result of computer misuse.
4. **Police action:** When required to do so, or when The Academy deems necessary, The Academy may inform the police.

When a connection to The Academy network has been made, you are confirming your acceptance of this policy.

- You agree and accept that the wireless service is used at your own risk.
- You agree and accept that your equipment is used at your own risk.
- You agree and accept that no technical support will be provided for personal devices.
- You agree and accept that this wireless service will not be misused. Examples of misuse include but are not limited to:
  - fraud and theft;
  - system sabotage;
  - introduction of viruses, trojans, malware, spyware and time bombs;
  - obtaining unauthorised access to any services;
  - breaches of Software Licensing Copyright Act, Computer Misuse Act, Data Protection Act;
  - sending abusive, rude or defamatory messages via email or any other means;
  - accessing pornographic web sites;
  - transmission of unsolicited advertising;
  - hacking or attempted hacking;
  - disabling or overloading any Academy computer systems or network, or circumventing any system intended to protect the privacy or security of another user.

**All ICT usage is monitored in The Academy at all times.**

# 16. The Harefield Academy's ICT Acceptable Use Agreement for staff.

**User Signature**

I agree to adhere to the ICT acceptable use policy at all times.

I understand that it is my responsibility to ensure that I remain up-to-date and read and understand The Academy's most recent e-safety policies.

I wish to have an email account; be connected to the Intranet and Internet; be able to use The Academy's ICT resources and systems.

Signature ……Date…….....

Full Name ……..... (printed)

Job title……

School ……

**Authorised Signature**

I approve this user to be set-up.

Signature ……Date…….....

Full Name ……. (printed)

# 17. The Harefield Academy's ICT Acceptable Use Agreement for students.

- Your password is confidential and **must not** be given to anyone else.
- You **must not** allow anyone else access to the network though your network account.
- You **must not** damage any computer equipment. Students are responsible for the safekeeping of any IT equipment in their use or possession. Any equipment damaged intentionally or accidentally is likely to result in charges. This applies to all equipment used in the school day and any equipment lent to the student for educational use.
- You **must not** undertake any activity that could lead to damage of any software on the network.
- You **must not** disconnect any of the computer equipment.
- You **must not** eat or drink near any of the computer equipment.
- You **must not** copy any software or data onto the network that infringes British Law or may be considered offensive. (This includes any copyrighted music and video files)
- You **must not** copy, delete or modify any files on the network that are not in your user account area.
- You **must only** use the Internet for activities that are directly related to your registered Academy course, you cannot access chat rooms, games or download ring tones, etc.
- You **must not** send any e-mail messages that could be considered to be offensive.
- You will be responsible for all information and data stored in your account area of the network (H:)
- You accept that all of your files that you store or access on The Academy network can be remotely and locally viewed by any member of The Academy's Staff.

**Student User Signature**

I agree to abide by all the requirements above.

I wish to have an email account; be connected to the Intranet and Internet; be able to use The Academy's ICT resources and systems.

# 18. E-Safety: Code of Practice

**What is E-Safety?**
Whilst the internet and associated technologies are an excellent tool and resource to enrich learning there are still dangers related to their use, especially in relation to young students. Some examples of this are:

- Bullying via chat or email
- Obsessive internet use
- Exposure to inappropriate materials
- Inappropriate or illegal behaviour
- Physical danger of sexual abuse

The Harefield Academy will endeavour to ensure the E-Safety of all Academy members. It will use education, technology, accountability, responsibility and legislation as the key ways to achieve this.

Within The Academy all members of staff and students are responsible for E-Safety. Responsibilities for each group include:

Students

- Participating in and gaining an understanding of E-Safety issues and the safe responses from E-Safety training sessions.
- Compliance with a highly visible student's Acceptable Use Policy (AUP) which students must agree to each time they use Academy ICT equipment either in The Academy or remotely which connects to the internet.
- Reporting any E-Safety issue to the teacher, team leader or parent/carer.
- Take responsibility for their own actions using the internet and communications technologies.

All Staff

- Have a clear understanding of E-Safety issues and the required actions from E-Safety training sessions.
- Reporting any E-Safety issues to the ICT Manager and the Child Protection Officer as soon as the issue is detected.
- Compliance with The Academy's Data Security, E-safety and acceptable use of ICT Policy which staff must agree to each time they use Academy ICT equipment either in The Academy or remotely which connects to the internet.

Teaching Staff

- Educating students on E-Safety through specific E-Safety training sessions and re-enforcing this training in the day to day use of ICT in the classroom.

ICT Manager

- Ensure that the best technological solutions are in place to ensure E-Safety as much as possible whilst still enabling students to use the internet effectively in their learning.
- Ensure that all information captured using these systems is secure, accessible to the appropriate members of staff, and stored in a robust manner. In addition securing and preserving evidence of any E-Safety breach.

- Checks and audits on all systems to ensure that no inappropriate data is stored or is accessible.

ICT Team

- Monitors the technology systems which track internet use to detect safety breaches.

# 19. How The Academy ensures E-Safety in the classroom

**Educating students in E-Safety**

A clear objective of The Academy is to educate students in safe use of ICT and the internet. We feel this is one of the best ways to minimise the potential for any E-Safety issues to occur.

Students will receive specific E-Safety lessons aimed at ensuring that:

- students know the E-Safety risks that exists and how to identify when they are at risk;
- students know how to mitigate against E-Safety risks by using e-safe practices whilst online;
- students know when, how and to whom to report instances when their E-Safety may have been compromised;
- students know that they are in an environment that encourages them to report E-Safety issues without risk of reprimand, humiliation or embarrassment.

In addition to this specific training all members of staff will have a duty to reinforce E-Safety practices wherever possible and will offer students advice and support in the classroom where minor E-Safety incidents have occurred.

E-Safety education information will have high visibility in all areas of The Academy.

**How E-Safety is monitored**

The ICT support team will actively monitor the students ICT activity using a monitoring system which can flag potential E-Safety issues. They will periodically review internet access logs to track any websites which could potentially present an E-Safety issue.

The ICT Manager and Child Protection Officer will periodically review the E-Safety log to track trends and use the information to look at ways of improving E-Safety for students.

Teaching staff will directly monitor the students ICT and internet use in the classroom.

**How technology is used**

The Academy will employ many different technologies to help to ensure E-Safety for all Academy members;

- The Academy will use internet filtering to block inappropriate content and in addition block websites which are irrelevant to the students' programme of study and are considered time wasting.

- The Academy will use a system which tracks all student activity on The Academy's computers. This system will automatically flag potential E-Safety issues which will be monitored and then can be investigated.
- The Academy will restrict which activities the students can perform using ICT and the internet through systems security policy and access control.
- Teaching staff will use control mechanisms to attempt to limit the applications and web sites which the students can visit whilst using ICT within a lesson.

**Examples of unacceptable student behaviours that would infringe E-safety include, but are not limited to:**

- use of websites not directly linked to class work;
- unauthorised use of email;
- accidentally accessing offensive material and not notifying a member of staff of it;
- deliberately corrupting or destroying someone's data;

- sending an email that is regarded as harassment or of a bullying nature;
- deliberately trying to access offensive or pornographic material;
- any purchasing or ordering of items over the Internet;
- transmission of commercial or advertising material;
- deliberately accessing, downloading and disseminating any material deemed offensive, obscene, defamatory, racist, homophobic or violent;
- receipt or transmission of material that infringes the copyright of another person or infringes the conditions of the Data Protection Act, revised 1988;
- bringing The Academy name into disrepute.

**Any behaviour which compromises E-safety will be addressed in line with the behaviour policy and sanctioned accordingly.**

**Working with parents and the community**

Many Academy students will also have access to ICT and the internet at home, often without some of the safeguards that are present within The Academy environment. Therefore parents must often be extra vigilant about their child's E-Safety at home.
One of the goals of The Academy is to support the parent's role in providing an e-safe environment for their children to work in outside The Academy.
The Academy will do this in several ways:

- Provide advice on E-Safety.
- Upon request publish E-Safety information and direct parents to external E-Safety advisories via The Academy online parents portal and Academy website.
